

EXPERIENCE

Founder & Infra Architect > Left Click > Los Angeles, CA

2026 - Pres.

- Built cost-effective self-hosted data and network solutions aimed at improving reliability, security, and accessibility, including NAS, RAID, backup servers, VLAN, reverse proxy, GitOps, monitoring, and data pipelines.
- Directed client outreach, needs assessment, procurement, and collaboration, ensuring optimal delivery and client satisfaction.

Infrastructure Engineer > Filmtools > Burbank, CA

2022 - 2025

- Architected an enterprise-scale cloud IaaS platform by virtualizing on-premise hardware to QEMU/KVM; automating VM orchestration and IAM via PowerShell to Proxmox and Active Directory; and configuring VLAN in coordination with IT.
- Achieved 200+ stock updates/hour by collaborating on the design of an SQS, EC2, and DynamoDB architecture, and programming fail-state detection, IP rotation, and exponential backoff, with on-prem write-validation to sync with NetSuite.
- Implemented client-facing RESTful API in Node.js / Express.js, with logic for robust validation, data sanitization, error monitoring, caching, statelessness, and secure authentication via integration with Auth0 OAuth SSO.
- Expedited turnaround by 400 hours/year by automating vendor pricelist parsing via AI (GPT-4 API), deploying a web UI for internal data review, scheduling, and submission to the enterprise database via SuiteTalk REST API.
- Coordinated with stakeholders, vendors, and clients to identify priorities, resolve tradeoffs, and align design to requirements.

Platform Engineer > University of Southern California > Los Angeles, CA

2021 - 2022

- Accelerated deployment by 30 hours/week by implementation of project-specific CI/CD tests and pipelines in GitHub Actions to facilitate multi-layer scene development workflow in the Ahmanson Lab's Unity-engine repositories.
- Served as primary technical consultant to researchers and faculty publishing with USC's Scalar platform, advising on usage, developing API extensions tailored to feature requests, and driving projects to production, improving platform publication rate.

IT Support Specialist > Fox Corporation > Burbank, CA

2019 - 2021

- Administered IAM roles and permissions (Active Directory), NAS archival and data recovery (Qumulo, Drobo), and endpoint imaging, inventory, deployment, and decommissioning (Mosyle MDM).
- Interfaced with design and production teams, delivering prompt incident resolution involving troubleshooting workstations, software, storage, network, and render nodes, ensuring uninterrupted workflows across productions.

EDUCATION

Bachelor of Science > Computer Science > California State University Northridge

2018

SKILLS

Automation > Python, C++, PowerShell, bash

AWS Cloud > EC2, Lambda, S3, DynamoDB, IAM

GenAI > OpenAI API, Cursor, Claude Code, Copilot

Backend > Node.js, Express.js, Socket.io, Flask, Redis, Auth0

Infrastructure > GitHub Actions, Terraform, Docker, Kubernetes

Reliability > Prometheus, Grafana, Loki, Gremlin
